## EXPERIENCE

Research Assistant in Robotics and Intelligent Vehicles Research Laboratory, WPI

**Physics-Based Robot Simulation**, WPI 07/2015-09/2015

- Constructed the simulation for the 2-link pelican robot arm, the AscTec Hummingbird quadrotor and an ackerman-steering RC car in V-REP
- Implemented code to interface with the simulator for each simulated robot with ROS and remote-API interfaces
- Integrated a C++ logger into the simulation/control code and wrote Matlab scripts to analyze log files generated by the logger

**DARPA Robotics Challenge Trials & Finals**, Team WPI-CMU, WPI 09/2013-06/2015

- Participated in the discussion and decision making of overall team strategies and led a sub-team towards the completion of wall task
- Implemented the state machine and position and force controller for motions of wall cutting
- Studied the whole-body manipulation controller developed by CMU and collaborated on the interfacing with task-level features
- Experimented on strategies for the door task of DRC Trials to traverse different types of doors
- Developed the motions and user control interface for the door task using MoveIt and Qt
- Performed numerous tests on both the real Atlas Robot and the Gazebo simulator to tune controller parameters and explore feasible motions

## PROJECTS

### **Robotics Enabled In-Home Environment Screening for Fall Risks**, WPI 01/2014-05/2014

- Worked out a robotic framework for home fall risk assessment, including setting up the software for both the Turtlebot2 platform and the Gazebo simulator, adding new sensors and developing drivers, implementing a web interface based on the "Robot Management System" to make the system accessible from a web page
- Studied the navigation of mobile robots in home environment and potential applications of robotic technologies for improving the life quality of elderly people, prepared preliminary results for proposal of further research on this topic

### **Intelligent Portable Aerial Surveillance System - IPASS**, WPI 12/2012-05/2013

- Developed the dynamics model of the aircraft model and simulated its control in Matlab
- Provided support to the undergraduate team of this project for improving the mechanical design of the aircraft, based on the theoretical analysis
- Evaluated different image stitching techniques to get panoramas from cameras on the aircraft

### **Autonomous Flight Control of a Quadrotor**, WPI 02/2012-12/2012

- Studied the kinematics and dynamics model of the quadrotor
- Simulated the attitude and position control algorithms and visualized the results in Matlab
- Implemented and tested the position control on the AscTec Hummingbird quadrotor
